Note: Data which cannot be shown without disclosing information for individual companies have been combined with figures for other size classes. A (D) appears in the column where the figure has been omitted and the combined figure is underlined and shown in the size-class to the left.

(D) Withheld to avoid disclosing figures for individual companies.

The "average values" are based on the entire shipments of the specified product by each establishment. Thus they are representative of varied average prices among establishments but not variations within an establishment.

Respondents were requested to include, besides the value of residue gas, the producers' realization from all products contained in the gas delivered to natural gas liquids plants.

*Represents volumes adjusted to a pressure base of 14.65 pounds absolute at 60°F.
